

TRU FLOOR

Roberto Paoli

Family of floor and suspension lamps made of two light vertical panels that hide the light source thanks to an optical effect.

Extruded aluminum structure, die-cast aluminum terminals and base, opal and transparent methacrylate diffusers. The structure is painted in matt white, matt black, titanium gray and gold (for the floor version only). The LED uplight source creates a diffused light towards the ceiling, while the side LED generates an indirect ambient light. Equipped with a double dimmer for independent control of the two light sources.
