LAMPES A PORTER

Poldina pro mini is a rechargeable table lamp, with contact charging base, painted aluminum body, polycarbonate diffuser and LED light source.

The lamp is switched on and off by a touch button located on the top of the diffuser; with the same button it is possible to dim the intensity of the luminous flux and adjust the color temperature of the light, choosing between 2700 and 3000K. The lamp also has a dimmer memory function (when the lamp is switched on, the light intensity will correspond to that previously set) and an IP65 degree of protection which makes it suitable for both indoor and outdoor use.

Battery life is guaranteed for more than 9 hours.

The lamps with gold, chrome and silver finish are not recommended for continuous outdoor use.

Available on request, with minimum ordering quantities, customized painting with RAL colours and logo pad-printing service.

Accessories:

- Multi-contact charging base (max 6 pc) - LD0350RP
- Multi-socket USB charger (8xUSB) - LD0340RA
- Replacement battery pack BAT04703706701900
